# 4.11 Software

Licences for a number of applications (e.g. Citavi, Visual Paradigm, ...) are made available via the computer centre.

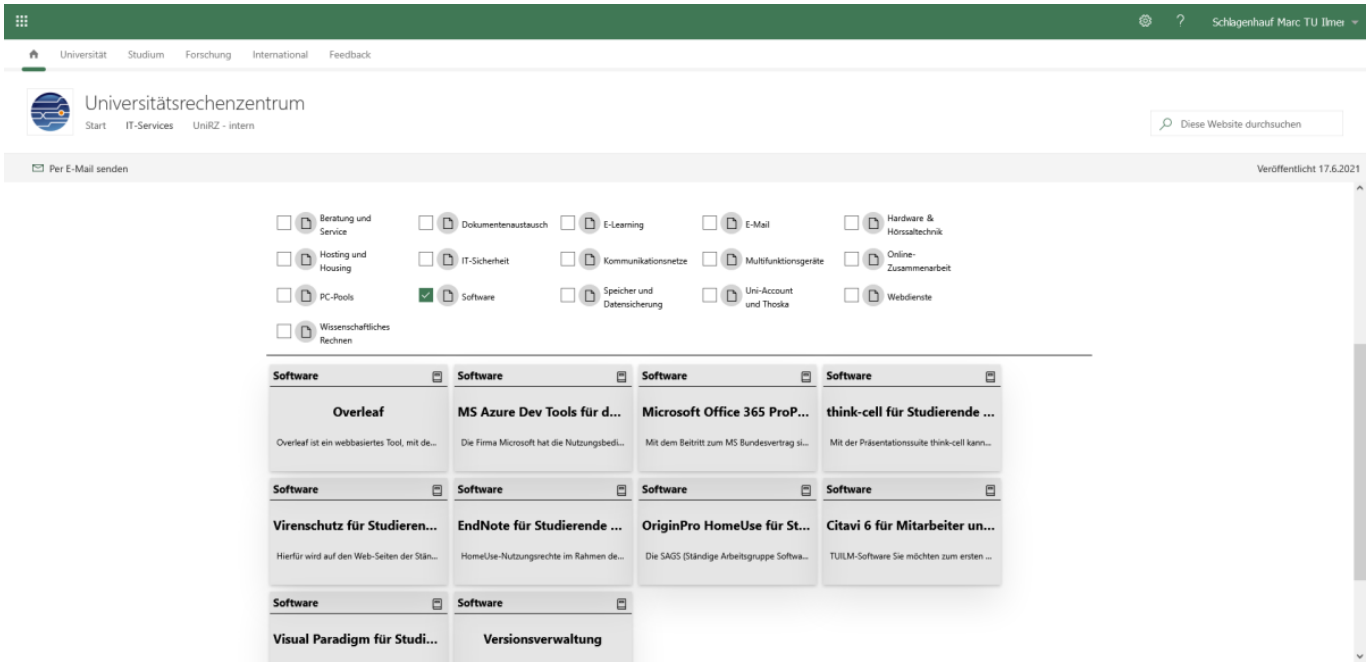

Abbildung 1: Call up the page IT-Services Open the intranet page and tick „Software“.

## MATLAB

A campus licence for the MATLAB software is available at the TU Ilmenau. The programme itself as well as a licence key for academic use can be obtained from the Website of the manufacturer.

Was can I do with it?

## Computational Cabinets (RTK)

In the RTK (PC pools), the Computer Centre provides students with computers equipped with various software (Adobe products, MATLAB), some of which is otherwise available for a fee. The exact software equipment can be found on the Intranet (RTK 2, RTK 5, RTK 6, RTK 7). For the use of the software by students outside of lectures, a Antrag must be submitted to the UniRZ.

RTK 2, RTK 5 and RTK 6 are located in the computer centre. RTK 7 is located on the ground floor of the EAZ.
